

# Meera Dave

Atlanta, GA | (770) 568-4255 | [mdave39@gatech.edu](mailto:mdave39@gatech.edu) | [linkedin.com/in/meera-dave](https://www.linkedin.com/in/meera-dave) | US Citizen

## EDUCATION

### Georgia Institute of Technology

*Bachelor of Science in Computer Science | GPA: 3.7*

Atlanta, Georgia

*Graduating December 2026*

- Concentrations: Artificial Intelligence and Human-Computer Interaction
- Relevant Courses: Machine Learning, Computer Vision, Data Structures and Algorithms, Object Oriented Programming, Linear Algebra, Perception & Robotics, Statistics, Computer Organization and Programming

## EXPERIENCE

### Manhattan Associates

*Software Consultant Intern*

Atlanta, Georgia

*August 2025 – Present*

- Built an AI-powered client onboarding tool that ingests training documents and videos to auto-generate tailored training materials and authored internal technical documentation for the tool to support team knowledge transfer.
- Developed a script that automated image re-sizing, reducing formatting time by 80%; independently diagnosed unsupported image output by inspecting generated documents and resolved it through iterative prompt engineering.
- Improved warehouse system throughput by profiling and rewriting slow MIF (Manhattan Integration Framework) SQL queries, eliminating redundant pipeline stages, and refactoring data pipelines to enhance scalability.
- Implementing frontend testing using TypeScript and automating cloud testing with Jenkins and Azure DevOps.

### Nokia

*Frontend Software Engineering Intern*

Naperville, Illinois

*June 2025 – August 2025*

- Developed a customer service platform using WebRTC and IMS DC to support voice and video communication.
- Designed and tested responsive interfaces for web and mobile using JavaScript, HTML/CSS, and Android Studio.
- Built backend services in Go, orchestrated deployments with Kubernetes, and maintained CI/CD pipelines to deliver real-time calls with interactive features including white-boarding and file-sharing across different environments.
- Developed API frameworks that allow clients to customize the application based on their customer support process.

## PROJECTS

### Serve | Full-Stack Social Recipe App

*May 2026 – Present*

- Created a social recipe platform on Supabase Postgres, choosing a relational model to support a complex social graph (follows, likes, comments, DMs); designed and normalized the schema to eliminate slow multi-table feed joins.
- Built REST microservices: an LLM-powered recipe importer that parsed unstructured web content into a structured recipe format and a trigger-driven push-notification service that sends alerts to followers on the Expo Push API.

### 28ish Menstrual App | Mobile Application Project

*August 2024 – May 2025*

- Designed and implemented predictive data models using menstruation trends to deliver personalized insights and cycle forecasts, empowering women to manage their reproductive health with smarter symptom tracking.
- Built iOS app with React Native and TypeScript, using PostgreSQL for storage and Firebase for authentication.
- Conducted peer code reviews on a team of 5 contributors, ensuring code quality and consistency across the codebase.
- Designed iterative UI prototypes in Figma and conducted usability tests with ExpoGo, to refine user experience.

## LEADERSHIP

### GT Jadoo | Nationally Competitive Dance Team

*Captain*

Atlanta, Georgia

*August 2023 – Present*

- Directed team of 30+ members and created a Bollywood fusion dance set to compete against 45+ teams nationally.
- Applied video editing techniques to create digital backdrops for performances and engaging social media content.
- Managed a \$20,000 budget using Excel to strategically allocate funds across travel, set design, costumes, and events.

## TECHNICAL SKILLS

**Certificates:** Google UX Design Certificate, Boomi Professional Integration Developer Certificate, Microsoft Technology Associate: Software Development Fundamentals (MTA)

**Languages:** Java, Python, C++, C#, TypeScript, JavaScript, HTML/CSS, SQL

**Frameworks & Libraries:** React, Angular, Vue, Node.js, Django, TensorFlow, Spring, MySQL

**Tools & Platforms:** Git, Docker, AWS, MongoDB, VS Code, Android Studio, PyCharm, IntelliJ, CircuitSim, Figma
