EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science | GPA: 3.7

Atlanta, Georgia

Graduating December 2026

- Concentrations: Artificial Intelligence and Human-Computer Interaction

PRODUCT EXPERIENCE

Serve | Product Owner | Mobile Application

April 2026 – Present

- Identified recipe discovery and cooking inspiration as the core user problem by gathering feedback from 15+ user interviews.
- Prioritized AI voice-to-text recipe input, cross-app recipe saving, and a real-time grocery stock checker as launch features.
- Owned development from concept through launch, managing design decisions, iterative releases, and a user-centered experience.

28ish Menstrual Health App | Product Owner | Mobile Application

August 2024 – May 2025

- Led product development for a women's health app, defining the MVP feature set and prioritizing the roadmap around core flows including cycle tracking, symptom logging, and personalized insights, based on user needs and data-modeling constraints.
- Conducted iterative user research and prototype testing in Figma and ExpoGo, translating feedback into product improvements.
- Spearheaded full product lifecycle, coordinating design, engineering, and data modeling decisions to deliver a cohesive iOS UX.

TravelJAM | Product Designer | User Interface Project

May 2024 – July 2024

- Led product discovery for a travel planning app serving hundreds of users, conducting 30+ user interviews to identify pain points.
- Designed and iterated on a high-fidelity Figma prototype, translating user research into prioritized product requirements, directly shaping features like personalized budget filters, location-based recommendations, scheduling tools, and a discovery feed.

PROFESSIONAL EXPERIENCE

Manhattan Associates

Atlanta, Georgia

Change Management Consultant Intern

May 2026 – Present

- Develop and execute CM strategies across 3 concurrent client engagements in retail, life sciences, and healthcare, including stakeholder identification, sponsorship management, and organizational readiness assessments.
- Partner with project teams to analyze process design changes, assess organizational impact across affected business units, and translate findings into actionable CM plans and risk mitigation frameworks.
- Design end-user training programs, facilitate job impact workshops, and drive stakeholder buy-in across organizational levels to minimize disruption throughout the implementation lifecycle.

Software Consultant Intern

August 2025 – December 2025

- Identified and resolved performance bottlenecks in warehouse management workflows, improving system efficiency and scalability.
- Collaborated cross-functionally with engineering and operations stakeholders to define requirements, validate system changes, and ensure solutions aligned with business needs and deployment constraints.
- Improved release reliability by establishing frontend testing standards, reducing regression risk across the product.

Nokia

Naperville, Illinois

Frontend Software Engineering Intern

June 2025 – August 2025

- Drove a 25% reduction in average call handling time by identifying a peer-to-peer data flow inefficiency and collaborating with frontend, backend and infrastructure teams to ship an optimization, directly improving customer support productivity.
- Delivered a customer service platform supporting live whiteboarding and file sharing across web and mobile, coordinating feature scope and release milestones from requirements through launch.
- Designed the platform for enterprise-scale deployment, scoping reliability and customization requirements to support diverse customer support workflows across large organizations.

LEADERSHIP

GT Jadoo | Nationally Competitive Dance Team

Atlanta, Georgia

Captain

August 2023 – Present

- Led a 30+ member team to compete against 45+ programs nationally, managing creative direction and performance execution.
- Managed a \$20K operating budget, making tradeoffs across travel, costumes, set design, and event priorities to maximize competitive readiness under resource constraints.
- Strengthened team brand and audience engagement with digital content including video backdrops and social media presence.

SKILLS

Product & Design: Figma (high-fidelity prototyping), user research & usability testing, product roadmapping, data-driven iteration, wireframing, experiment design, success metrics

Certificates: Google UX Design Certificate, Boomi Professional Integration Developer, Microsoft Technology Associate: Software Development Fundamentals

Technical: Python, SQL, JavaScript, TypeScript, Java, HTML/CSS, able to translate technical constraints into product requirements

Tools: Figma, Git, AWS, MongoDB, Docker, Android Studio, Excel, VS Code
